How to overcome 10 common file collaboration issues

Accessing and sharing file data across locations has never been more challenging. But deploying a global file services platform and keeping everything running smoothly is no easy task.

One of the best ways to ensure your entire organisation benefits fully from rapid access to data, efficient file sharing and increased productivity is by identifying the major file collaboration headaches so you can tackle them head-on.

Let's look at the top 10:

1 RIGHT-SIZING ISSUES
Difficulties right-sizing, risking performance issues from under-provisioning or unnecessary expense from over-provisioning.

2 LIMITED IT RESOURCES
Lack of in-house resources to manage long-term multi-site deployment and limited public cloud support.

3 ESCALATING EXPENDITURE
Poor ROI due to mounting public cloud charges, server sprawl and expensive hardware upgrades.

4 USER FRUSTRATION
Users suffer slow file transfer speeds, conflicting file versions and re-work.

5 LIMITED ACCESS
Difficulties sharing data - particularly huge complex files - across locations.

6 COLLABORATION COMPLICATIONS
Latency and inconsistent data sets hinder access and productivity.

7 POOR RESILIENCE
Local storage, data replication and multiple file versions slow backups and recovery.

8 SECURITY RISKS
Difficulties securing and protecting data from rising cyber threats.

9 COMPLIANCE CHALLENGES
Issues managing global infrastructure complexity to meet security and regulatory compliance.

10 SCALABILITY STRESSES
Delays and costs to upgrade on premise technologies or expand deployment.

Sounds familiar? Fortunately, there is a smarter way.

Make global collaboration simple with File-as-a-Service from Creative ITC

Our managed File-as-a-Service (FaaS) solution revolutionises storage, access and management of files across global regions, ensuring data is always available, secure and up-to-date. It consolidates files from multiple locations, while giving a truly local, high performance file experience.

Uniquely hosted in Creative's private cloud, it gives you full control, easy scalability and outstanding sustainability, without management headaches or public cloud data egress fees.

Our experts rightsize and optimise it for your needs, however many sites you have, or where your team works. Plus, we'll manage your entire environment, ensuring the solution runs like clockwork.
