

Creative ITC's FaaS: Unleashing New Dimensions in Global File Management

In an era where seamless global collaboration and rapid data access are pivotal, Creative ITC proudly introduces its File as a Service (FaaS) solution, powered by Panzura. Delivering proven, scalable data collaboration, this service allows businesses to leap forward in how they manage and access their data globally.

Powered by:

File as a Service (FaaS) Explained

File as a Service (FaaS) powered by Panzura, is a cutting-edge solution that revolutionises how businesses manage and access their data across global regions. It is a cloud-based service that simplifies the storage, access, and management of files, ensuring that data is always available, secure, and up-to-date.

FaaS harnesses the power of cloud technology to consolidate files from multiple locations, while giving a truly local file experience across multiple regions. This delivers a performant, consistent user experience, allowing data access from anywhere, at any time, facilitating seamless collaboration and data management.

Key features of FaaS include:

Global Accessibility

Users can access and work with files from any location, ensuring productivity and collaboration regardless of geographical boundaries.

Enhanced Security

Files are stored with market leading security measures, reducing the risk of data loss or leaks

Effective Recovery (Cyber)

Through Panzuras unique technology, data is stored, replicated and secured across all sites, protecting data for rapid recovery in the event of a cyber incident

Simplified IT Operations

FaaS eliminates the need for extensive on-site data management, allowing IT teams to focus on more strategic initiatives

In essence, FaaS provides a more efficient, secure, and collaborative way of handling files on a global scale, making it an ideal solution for businesses looking to modernise their data management systems.

PLATFORM

RE

Collaborate Without Borders

Imagine a world where geographical distances cease to hinder collaboration. Creative ITC's FaaS, with Panzura's global file locking and real-time metadata synchronisation, makes this a reality. Our FaaS solution ensures low latency, enabling real-time collaboration

across continents as if your team were in the same room. This seamless integration enhances productivity, breaking down the barriers of traditional data access and collaboration.

Management Made Easy

Creative ITC understands the complexities of IT environments. As one of only a handful partners in Europe with the technology and skills to support Panzura, Creative ITC offer a full managed service over your FaaS solution. We take on the heavy lifting, managing the

entire environment, including on-premises cache appliances. Our approach simplifies your IT operations, allowing you to focus on strategic initiatives while we ensure your data is efficiently managed, always available, and securely stored.

Cache for Local access Performance

Utilising Panzura's SmartCache technology, Creative ITC's FaaS offers an experience akin to local storage performance. This intelligent caching at the edge ensures that your most accessed

data is readily available and proving consistent read/write performance for your users and their demanding applications.

Data Security and Ransomware Protection

With FIPS 140-2 certified and 256-bit military-grade encryption, Panzura CloudFS integrated into our FaaS solution offers a fortress of security. The immutable data protection and

robust ransomware defence mechanisms ensure that your data is not just stored but safeguarded against modern cyber threats.

Unmatched Flexibility and Efficiency

Choose Creative ITC's FaaS making your data accessible exactly when and where you need it. Our solution maximises efficiency by enabling continuous, rapid updates across

all sites with minimal overhead, embodying the essence of a true global file system.

Transform Your Business with Creative ITC's FaaS

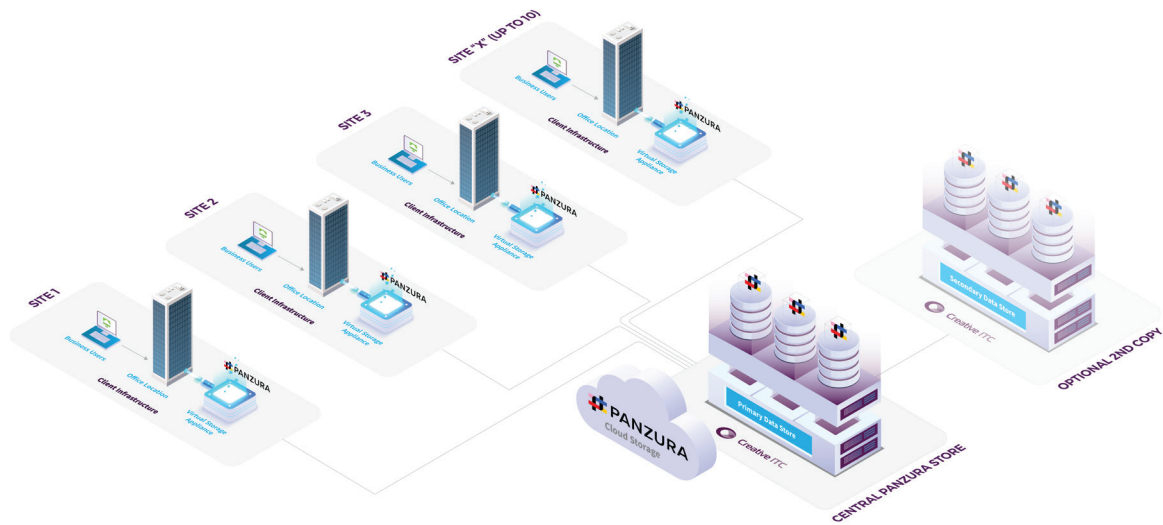

Creative ITC's FaaS powered by Panzura isn't just a service; it's a strategic enabler for your business. Embrace this innovative solution and join the ranks of globally recognised companies who have already revolutionised

their data management strategies. Let Creative ITC and Panzura transform your business operations, paving the way for unprecedented growth and success.

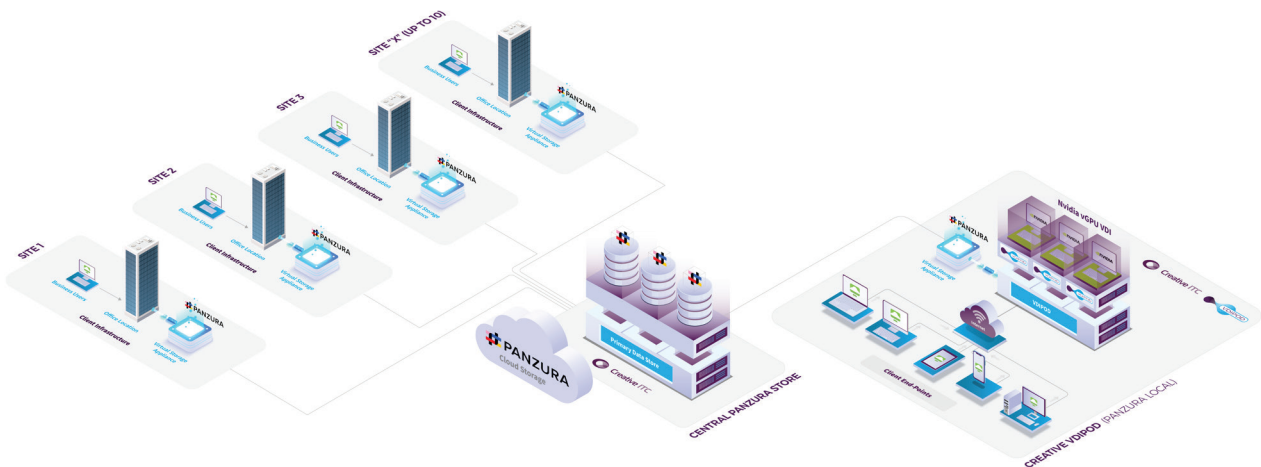

High level solution options demonstrating multi region, multi site deployment alongside the flexibility to host a cache with VDIPOD to deliver a great user experience

Benefits

Creative's fully managed File-as-a-Service enables you to:

Multiply productivity

End users find it easier to manage version control and work with their data, from anywhere – regardless of bandwidth, latency, time zones or distance.

Strengthen security

The latest cached file can always be accessed, plus there's less risk of data loss, or leaks at distributed locations through error, intrusion or disaster.

Simplify backup and disaster recovery

IT teams can remove local data backups from their busy schedules.

Lower total cost of ownership

The call on IT budgets reduces by not having to continually purchase and maintain local file servers and backup solutions.

Release your teams

With a fully managed solution, IT teams have more headroom to focus on transformational work, allowing the business to move forward

Creative ITC

Why Creative

We'll look after your data as if it was our own, adhering to proven processes and best practices like ISO 27001, the international information security standard. Our ratio of technicians to office staff is 4:1, significantly above our peers. Each specialist holds, or is close to attaining, the very highest qualifications in their field.

That's why Creative is a trusted partner for some of the world's biggest brands, involved in many of the largest IoT, cloud and digital transformations. It's also why we have one of the highest customer retention rates in the industry.
